

Touch Panel Accessories

Evaluation Kit for the FID-550 / 554 Series of Touch Panels

We understand that time is money and in order to fully see the advantages in using any of the FID 55X range of panels, an evaluation kit is necessary.

■ FEATURES

- Small footprint PCB (100mm x 40mm)
- FID 550 or 554 Panel (as specified)
- Example pen
- Supports all major OS types with driver software supplied on CD-ROM
- A complete solution for quick prototyping to final full design use, or as a design tool to speed up application and compatibility testing. Control boards and chips are available in volume quantities
